B. Family Coordinated Entry System and roles working in the Family System of Care

1. Family Coordinated Entry System

The Family Coordinated Entry System is intended to increase the efficiency of local crisis response, improve fairness, ease access to resources, and prioritize families who are most in need of assistance.

Responsibilities include:

- Establish, operate and monitor the Family Coordinated Entry System (FCES) that provides an initial, comprehensive assessment of the needs of families for housing and services and complies with any requirements established by HUD and our local Office of Care Coordination.
- Develop internal specific policies to guide the operations of the Family Coordinated Entry System on how its system will address the needs of

individuals and families who are fleeing, or attempting to flee domestic violence, dating violence, sexual assault, or stalking, but who are seeking shelter or services from nonvictim service Providers. This policy must comply with any requirements established by HUD, CoC and Funders.

The Family Solutions Collaborative is the administrators of the Family Coordinated Entry System for Orange County.

2. Systems Approach

Using a data-driven and evaluative approach, develop a plan that coordinates the implementation of a coordinated, equitable and timely system in the three Service Planning Areas that meets the needs of families experiencing homelessness. At minimum, such system includes:

- Outreach, engagement, and assessment; (as capacity allows by FSC staff)
- Shelter, housing, and supportive services; and
- Prevention and Diversion strategies

3. Point-In-Time Count

In coordination with the County of Orange and City Net, plans for and participates in the Point-In-Time Count (PIT) of homeless families in Orange County that meets HUD requirements, including an annual count of families living in emergency shelters and transitional housing projects and families who are living in a place not designed or ordinarily used as a regular sleeping accommodation for humans (i.e., unsheltered persons)

4. Data and Reports

Provide regular and ongoing data to help identify gaps of services for families in the community, as well as review of ongoing data and best-practices to advocate for quality programming and services for families in Orange County.

5. Shared Family Shelter Guidelines

In January of 2020, the FSC published the Shared Family Shelter Guidelines, as a result of an in-depth evaluation of family shelters (Emergency and Transitional) in Orange County. This endeavor was supported by First 5 Children and Families Commission. This Guide was prepared through a multi-agency collaborative process convened by the Family Solutions Collaborative.

Purpose of Family Shelter Guidelines

This document provides shared guidelines, policies and practices that apply to *all* participating family-serving shelters in Orange County, CA. It covers shared guiding principles, areas of common approach and intended family experience while in shelter, and the way that shelter is connected to the rest of the family crisis response system. The purpose of adopting these shared guidelines was to ensure that regardless of which participating shelter a family is referred to, they have a similar low-barrier entry experience, clear expectations for what support they will receive and what is expected of them, and an opportunity to achieve similar outcomes.

The Shared Guiding Principles include:

- Rapid Reentry
- Low Barrier Access
- Housing First
- Exit to Permanent Housing
- Trauma-Informed Care
- Best-Practice Informed and Adaptive
- Client-Centered Programming

Annual Peer Reviews occur with the Shelter to review the outcomes set forth in the Guidelines and to share opportunities and challenges with each other.

The FSC Executive Committee has 30 days to respond from the date of the receipt of the letter.

6. Bed Reservation System

The Family Solutions Collaborative manages the Bed Reservation System for participating and eligible FSC Shelters, and has been operational since 2019. The Bed Reservation System is for participating FSC eligible member agencies. And is a system by which families interested in waiting for Shelter are connected to available shelter openings quickly and efficiently by their Access Point.

Access Points will indicate that a family they are working with is interested in shelter by entering in that request into the FSC HMIS Project for the Bed Reservation System. The FSC is sent a daily report of the available shelter openings and has access to the families in need of shelter through the HMIS dashboard.

The FSC will match a family based off the shelter's eligibility requirements and prioritization standards.

Once the family is matched, the shelter provider contacts the family to schedule an intake into their shelter. The shelter Provider will then receive a warm hand-off from the Access Point previously assigned to the family and will take over as the family's lead as they navigate through FCES.

In order for Shelters to participate in the Bed Reservation System, they must apply to be an FSC Shelter. (see details above)

7. Diversion Expansion through the Family System

Diversion (also known as Problem-Solving or Rapid Resolution) is a short to long term housing intervention that seeks to assist participants to identify an immediate and safe housing alternative within their own network of family, friends and social supports or support into a housing opportunity.

By working alongside families facing a housing crisis in an empowering manner, Diversion can assist them at the very beginning of their housing crisis, or shortly after thereafter. Diversion ensures that those households who do not have alternative housing options are quickly connected to existing emergency or crisis housing services to ensure their immediate health and safety needs are met.

The Family Solutions Collaborative, with support from First 5 Children and Families Commission of Orange County, has developed a comprehensive, systems-wide approach to support and enhance the family homeless response system meant for capacity building and sustainability.

The nine FSC Access Points are participating this systems-wide project.

8. Technical Assistance and Training

The Family Solutions Collaborative shall provide a variety of technical assistance and training to the membership, open and closed Access Points, Shelters and Domestic Violence / Victim Services member agencies.

These may include one-on-one, group and professional trainings as well as knowledge-based articles and recorded trainings related to building staff capacity and enhancing the family homeless response system.
